

Sim-Sim

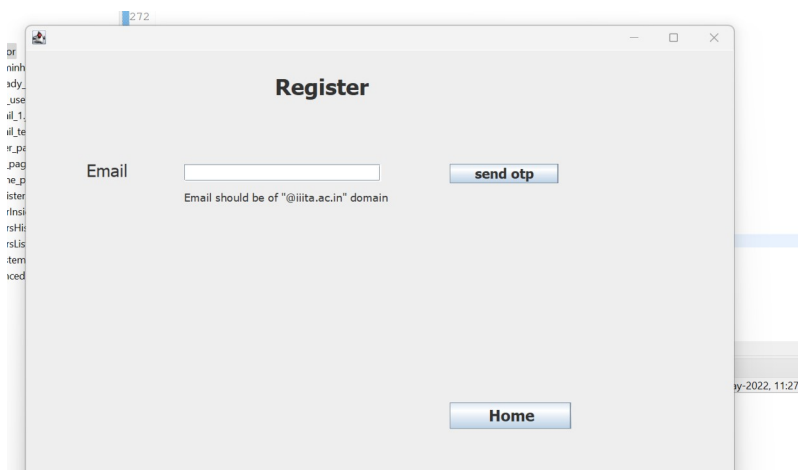

A Java application that allows users to enter/exit in the building.
It has two Interfaces for admin and users.

Technologies used

- Java for back-end
- Java swing for interface
- MySQL for managing Database

Users have to register firstly by college mail and verify that mail by mail OTP. After registration users will get a password by mail which he/she can use to enter/exit.

Dear user,

OTP for registration is 83353

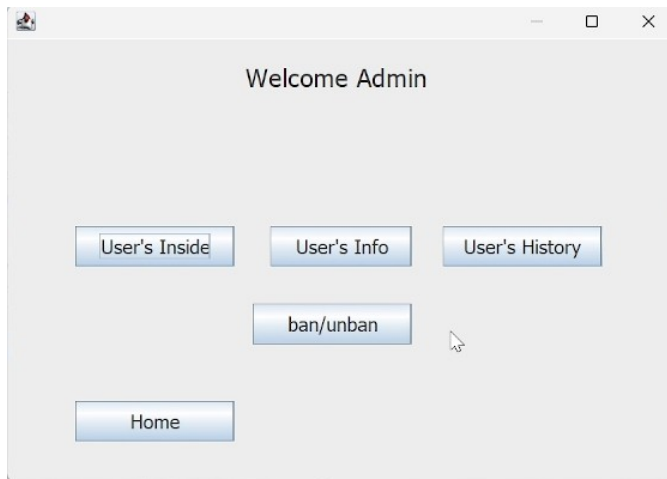

Dear user,

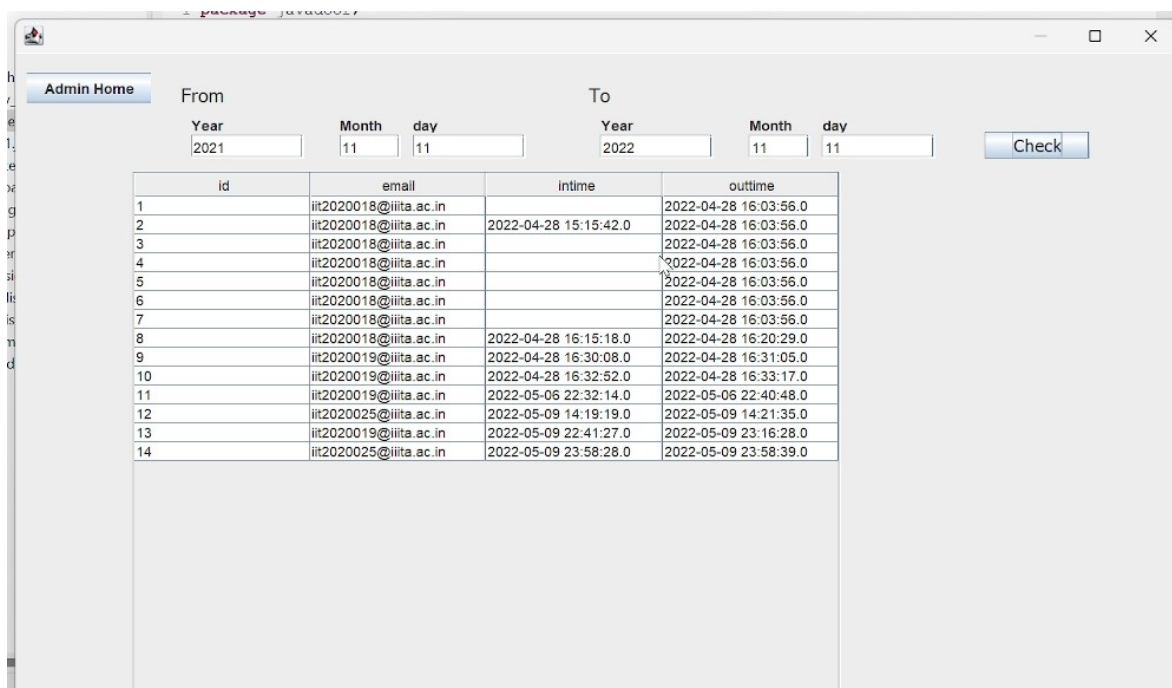

your password for entering cc3 building is XD3TD

- Admin can check users info
- Admin can check history of users entered in any time interval
- Admin can Ban/unban any users
- Admin can check users that are currently inside building
